# Rapid Electroplating Process, Inc SAFETY DATA SHEET

Conforms to: 29CFR 1900.1200 App D Complies with Canadian WHMIS MSDS Requirements Based on CCOHS:A Brief Summary of Canadian Requirements (Apr 2014) Conforms to Regulation (EC) No.453/2010/EU (REACH)

#### 1. IDENTIFICATION OF THE SUBSTANCE AND OF THE COMPANY

Product Identification:	Activator #4
Product Use:	Selective Electroplating
	Rapid Electroplating Process, Inc. 2901 W. Soffel Ave. Melrose Park, IL 60160 USA
Telephone	00-1-708-344-2504 (9:00 A.M4:30 PM, CST/CDT, M-F)
Emergency telephone:	In U.SCHEMTREC 1-800-424-9300 (24 Hrs) Outside U.S 001-703-527-3887 (call collect)
Date of Issue (Version):	Jan 2018

#### 2. HAZARDS IDENTIFICATION

Note Unless noted, hazard information presented here is based on the properties of the full strength constituent chemicals with RAPID product concentrations > 1 wt% (>0.1 wt% if identified as carcinogenic). This product contains diluted forms of the chemicals which should be taken into account when evaluating the hazards of the product as a whole.

Hazard	Category	Hazard	Category
Acute Toxicity		Reproductive Hazard	-
Oral	3 (ATE Product LD50)	Germ Cell Mutagenicity	Unknown
Dermal	Unknown	Reproductive Toxicity	DUPONT reports that limited reproductive studies do not suggest effects from sodium cyanide. Some tests have shown the potential for developmental toxicity but only at exposure levels producing toxic effects in the adult animal.
Inhalation Dusts/Mists	Unknown	Lactation	Unknown
Skin Corrosion	1B (pH<11.5, in vitro test)	Target Organ Toxicity	
Serious Eye Damage/Irritation	1	Single Exposure	Eyes, skin, cardiovascular system, respiratory system, mucous membranes
Carcinogenicity	No Component Categorized by IARC, NTP	Chronic Exposure	Central nervous system, thyroid
Respiratory/Skin Sensitizations	Unknown	Aspiration Hazard	Unknown

Hazard Category	Signal Word	Precautionary Statements:	Hazard Symbol(s) (GHS):
1B (Skin Corrosion/Irritation)	Danger	Causes severe skin burns and eye damage	A A A A A A A A A A A A A A A A A A A
3 (Acute Toxicity-Oral)	Danger	Toxic if swallowed	

## Hazard Statements (US-GHS):

ID	Hazard Statement		
EUH031	Contact with acids liberates toxic gas		
EUH066	Repeated exposure may cause skin dryness or cracking		
EUH210	Safety data sheet available on request.		
EUH401	To avoid risks to human health and the environment, comply with the instructions for use.		
H301	Toxic if swallowed		
H311	Toxic in contact with skin		
H314	Causes severe skin burns and eye damage		
H320	Causes eye irritation		
H331	Toxic if inhaled		
H401	Toxic to aquatic life		
Precautionary St	atements (US-GHS):		
ID	Precautionary Statement		
P102	Keep out of reach of children		
P103	Read label before use		
P220	Keep/Store away from clothing/acids/foodstuffs/combustible materials		
P233	Keep container tightly closed		
P234	Keep only in original container		
P235	Keep cool		

Jan 2018 (Supersedes Previous Editions) (US-Can Version)

ID	Precautionary Statement	
P261	Avoid breathing dust/fume/gas/mist/vapours/spray	
P262	Do not get in eyes, on skin, or on clothing	
P264	Wash exposed skin thoroughly after handling	
P270	Do not eat, drink or smoke when using this product	
P271	Use only outdoors or in a well-ventilated area	
P273	Avoid release to the environment	
P280	Wear protective gloves/protective clothing/eye protection/face protection	
P301+310	IF SWALLOWED: Rinse mouth. Do NOT induce vomiting. Immediately call a POISON CENTER or doctor/physician	
P303+361+353	IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/shower	
P304+340	IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing	
P305+351+338	IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do - continue rinsing	
P309+311	IF exposed or you feel unwell: Call a POISON CENTER or doctor/physician	
P321	Specific treatment (see items on label and SDS)	
P330	If swallowed, rinse mouth	
P332+313	If skin irritation occurs: Get medical advice/attention	
P337+313	If eye irritation persists get medical advice/attention	
P362	Take off contaminated clothing and wash before reuse	
P370	In case of fire use extinguishers suitable for surrounding fire (avoid CO2).	
P403+233	Store in a well ventilated place. Keep container tightly closed	
P405	Store locked up	
P501	Dispose of contents/waste/container according to national/state/local regulations	
Hazards Not Otherwis	e Classified None known.	
Ingredients with Unkn	own Toxicity None >1%	

## 3. COMPOSITION/INFORMATION ON INGREDIENTS

Coatalyte/Activator (Activator #4):

Chemical Name	Common Name	CAS-No	Concentration (Wt%)
Sodium Cyanide	Prussiate	143-33-9	< 7
Sodium Carbonate Monohydrate	Soda Ash Light	497-19-8 (Anhydrous)	< 5
Components not designated as hazardous or <1 wt% or carcinogen <0.1 wt%	Various	Various	> 88
Note Because of manufacturing variance physical properties listed here sho be construed as specifications.			

### 4. FIRST AID MEASURES

Description of First Aid Measures:		
General Information:	Move to fresh air; flush affected area with water (especially under eyelids if eyes affected); remove contaminated clothing; treat for shock as necessary. Never give anything by mouth to an unconscious person.	
Following Inhalation:	Move to fresh air. If breathing stops, give artificial respiration/oxygen as appropriate. Call physician.	
Following Eye contact:	Rinse with clear water, especially under eyelid. Consult Physician.	
Following Skin contact:	Wash affected area with soap and water. Consult physician if irritation occurs.	
Following Ingestion:	Call a poison control center (PCC)/physician/emergency responders immediately and follow instructions.	
	If victim is conscious: Rinse mouth. If directed, administer water or milk and/or oxygen if symptoms develop.	
	Do not administer emetic or induce vomiting. Never give anything by mouth to an unconscious person.	
	If victim has stopped breathing: Call a poison control center (PCC)/physician/emergency responders immediately and follow instructions.	
	As a part of safety planning, consult physician regarding use of oxygen/amyl nitrate especially if heart conditions exist in workers.	
Most Important Symptoms and Effects		
Acute:	Irritant to skin, eyes and other mucous membranes. TLV 'skin' notation indicates that cyanide may penetrate the skin, especially if broken.	
Delayed:	DUPONT suggests that small exposures to cyanide continuing over a long period have caused decreased thyroid activity and kidney changes. Long-term administration to dogs have produced unspecified acute intoxication symptoms, increased numbers of red blood cells, decreased proteins and central nervous system changes. Literature indicates that body can metabolize small amounts of cyanide without chronic/long term residual effects.	
Indication of Immediate Medical Attention a Special Treatment Needed:	and Cyanide Exposure: Weakness, dizziness, confusion, headache, vomiting, skin/mucous membrane irritation. I the extreme case, cyanosis, unconsciousness and death. Cyanide disrupts the oxidative mechanism; skin ma have deceptively healthy pink to red color but with injury or lack of oxygen may be bluish. Prompt action is needed to prevent further injury or death.	

	DUPONT suggests that intravenous injections by a physician of sodium nitrite and sodium thiosulfate may be useful for severe cyanide exposure. Without symptoms, no treatment is suggesteddecontaminate and observe for at least 30 minutes (the biological half-life of cyanide in the body is about 20-90 minutes). An expansive discussion of cyanide first aid from the DUPONT MSDS is available on request. The Center for Disease Control also offers guidance for cyanide emergencies at http://www.bt.cdc.gov/agent/cyanide/.
L	Note: Dupont suggests that to prepare activated charcoal slurry, mix thoroughly 50 g of activated charcoal in 400 ml (about 2 cups) water.

#### 5. FIRE-FIGHTING MEASURES

Extinguishing Media:	As appropriate for surrounding fire.
for actaby reasons.	Avoid CO2 or acid-based extinguishers in confined area because they may react with spilled material to produce HCN.
Hazardous combustion products:	On extreme heating or mixing with acids: metal oxides, nitrous oxides, cyanates, and/or flammable HCN gas.
Special exposure hazards arising from the substance or mixture:	If material is free to mix with water, mixing may result in toxic water runoff.
Conditions of Flammability:	Not flammable (aqueous solution). See Section 9: Physical and Chemical Properties.
Advice for fire-fighters:	Wear self-contained breathing apparatus.
Additional information:	Collect contaminated fire extinguishing water separately. Do not allow entering drains or suface water.

#### 6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures:	Control access to spill area. Ensure adequate ventilation and avoid direct contact with material.
	Comply with all national, regional and local regulations for ultimate disposal of cyanide waste solution. Do not flush cyanide compounds into sewers which may contain an acid. Use toxic material disposal service or hypochlorite detoxification.
Methods for containment:	Use inert, absorbent material.
Methods for clean-up	Confine material in appropriately marked container. After pickup, clean affected area with mild hypochlorite (bleach, etc.)
Additional information:	Dispose of in accordance with local, regional and national regulations.

#### 7. HANDLING AND STORAGE

Precautions for safe handling:	
Handling:	DO NOT TAKE INTERNALLY. USE IN WELL-VENTILATED AREA. DO NOT MIX WITH OTHER CHEMICALS. Keep container closed when not in use. Keep away from children. Activator 4 may give off some ammonia gas during use, and under unusual conditions, HCN.
Usage:	To reduce the possibility of injury by splatter or obstruction of ventilation/air movement, do not crowd workpiece with body or face. Avoid conditions that could allow workpiece to: bend/spring-back and "flick" solution; or drop into puddled solution and splash.
Storage:	Store/use in ventilated areas and avoid temperature extremes. Keep away from foodstuff, acids and other incompatible materials. Do not store near combustible/flammable materials (in the event of fire and container rupture, there is the potential for cyanide solution runoff from fire-fighting water). As a strong poison, cyanides should be controlled and handled by responsible individuals. Keep away from children and foodstuff.
Specific end use(s):	Recommendations: Observe instructions for use.

#### 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

7 Exposure limit values:

Chemical Name ACGIH TV		ACGIH TWA	ACGIH STEL	OSHA PEL	
Cyanide Compounds Not Listed.		Not Listed.	5(Skin)C mg/m3 - as CN	5(Skin) mg/m3 - as CN	
Sodium Carbonate N	Monohydrate	Not Listed.	Not Listed.	15 mg/m3 - Particulates Not Otherwise Regulated (PNOR); 5 - Respirable fraction	
Sodium Cyanide		Not Listed.	5(Skin)C mg/m3	5(Skin) mg/m3 - as CN	
Note		al conditions of evaporation, only the water phase is expected to evaporate leaving the soluble salts behin thus believed to be meaningful only for the abnormal case in which the solution as a whole is introduced aerosol.			
Exposure controls:	:				
Engineering Controls: Local exhaust.					
Personal protectiv	ve equipment:	As appropriate for cond	ditions of use: Chemical aprons/suits, ey	e wash fountain, safety shower.	
Respiratory prot	tection:	NIOSH approved dust/mist respirator.			
Eye protection		Chemical splash goggles/face shield. Avoid use of contact lenses.		Ses.	
Hand protection: Gloves, rubber, e.g., butyl or neoprene.					
Skin protection As appropriate for cond		ons of use: Rubber aprons/suits			
Environmental ex	posure controls:	Maintain levels below of	community environmental protection thre	sholds.	
General hygiene considerations:		Practice good industria	NALLY. Keep away from eyes and out ( l/personal hygiene and safety practice; of clothing/materials that may have come it	do not smoke/eat/drink in area of use; wash

Persistence and degrada	bility:	Cyanida bior									
Bioaccumulative potentia			Cyanide biodegrades.								
Mobility in soil:			Cyanide biodegrades.								
Results of PBT and vPvB	Assessment:	None known	Cyanide is water soluble.								
Other adverse effects:		None known									
l											
13. DISPOSAL CO	NSIDERATIONS										
Waste treatment methods	flush cyanide	Comply with all national, regional and local regulations for ultimate disposal of cyanide waste solution. Do not flush cyanide compounds into sewers which may contain an acid. Use toxic material disposal service or hypochlorite detoxification.

	This Material Data Sheet was prepared in accordance with US/Canadian guidelines. All information, recommendations and suggestions appearing herein concerning our product are based upon information and data believed to be reliable. However, it is the user's responsibility to determine the safety, toxicity and suitability of the product described herein for his/her own use. Since the actual use by others is beyond our control, no guarantees expressed or implied are made by Rapid Electroplating Process, Inc. as to the effects of such use, the results to be obtained, or the safety and toxicity of the product, nor does Rapid Electroplating Process, Inc. assume any liability arising out of use by others of the product referred to herein. Nor is the information here to be construed absolutely complete since additional information may be necessary or desirable when particular or exceptional conditions or circumstances exist or because of applicable laws or government regulations.
